Sean:

As we talked about today, I am meeting with Harrison late Tuesday. Please do not commit to any market protection requests from St. Joe's until I get back to you on Wednesday. I will bring this up to them in person tomorrow night.

DC, take a look at the below, Saint Joe's just got funding released today for their second system. We will be working out the details early next week. Part of the discussion I am sure will be around market protection. Do you know where things currently stand with Harrison? Did they ever sign an LOI? I will need that information for our discussions next week. Thanks, have a great weekend.

CONFIDENTIAL-SUBJECT TO PROTECTIVE ORDER

ISI_32287

I followed up this morning with Don Weller after our conference call yesterday. CHI is going to proceed with two additional installs before the end of their FY June 30 – Bethesda North Shore and St. Joe's Tacoma #2. He needs to know what's in the initial stocking order for both. Can you please forward to me what's been constructed so we can sort? They want to carve out some market protection again, 2-3 surrounding counties each. I spoke to Brian Cyr – not an issue for Bethesda. Sean – any issues in granting protection in Tacoma area? I am talking to him again Tuesday afternoon 2pm (CST). Let me know if you want to join me on the call. We'll use my conference call number.

Have a good weekend,
Chris
